The sudden and brutal upheaval of Aboriginal people's lives in the Northern Territory in June 2007 by the Howard Government called the "Intervention" & its extension in 2012 by the Gillard Government for 10 years the so-called "Stronger Futures" has caused widespread havoc and distress.

The statistics tell us that:

- Child removals have increased; children are not safer.
- Housing is still overcrowded and in an appalling state
- Indigenous incarceration rates are increasing rapidly
- Suicide and self-harm incidents have increased
- The gap has not closed
- Violence is a continuous threat
- Poverty, trauma and despair is ongoing
- 99-year leases are just a Land grab

This racist, paternalistic policy denies our First Nations peoples their Human Rights and is maintained by both major parties. It must be repealed and First Nations peoples be given the right to self-determination and build their own future.

Let's use our Collective voice to finally help

REPEAL THE INTERVENTION!
